

Practical Aspects of Working with Smokeless Tobacco Users

Thursday, February 2, 2012

1 PM EST, Noon CST, 11 AM MST, 10 AM PST

Webinar Description:

Smokeless Tobacco (ST) use rates are on the rise. Join us for a webinar focused on practical ways you can partner, work with, and treat ST users. We are pleased to have Dr. Jon O. Ebbert from the Nicotine Dependence Center at the Mayo Clinic as our presenter. Dr. Ebbert is a primary care practitioner in the Division of Primary Care Internal Medicine, the Associate Director for Research of the Nicotine Dependence Center, and a Professor of Medicine at the Mayo Clinic College of Medicine. He has over 70 publications in the area of tobacco control and tobacco dependence treatment and is an internationally recognized expert in the field of smokeless tobacco research. Dr. Ebbert is currently conducting and has conducted numerous clinical trials assessing the efficacy of interventions for tobacco use. The following will be covered in this 90 minute educational webinar:

- An overview of ST (smokeless tobacco)
- Behavioral approaches shown to be effective for the treatment of ST users
- The role of pharmacotherapy for the treatment of ST users
- Resources that can be used by ST users to help them quit
